

Where did the unicorn boom take shape?

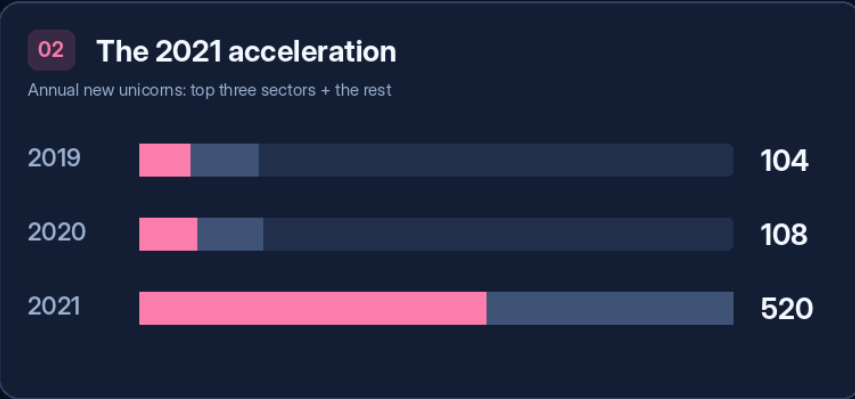

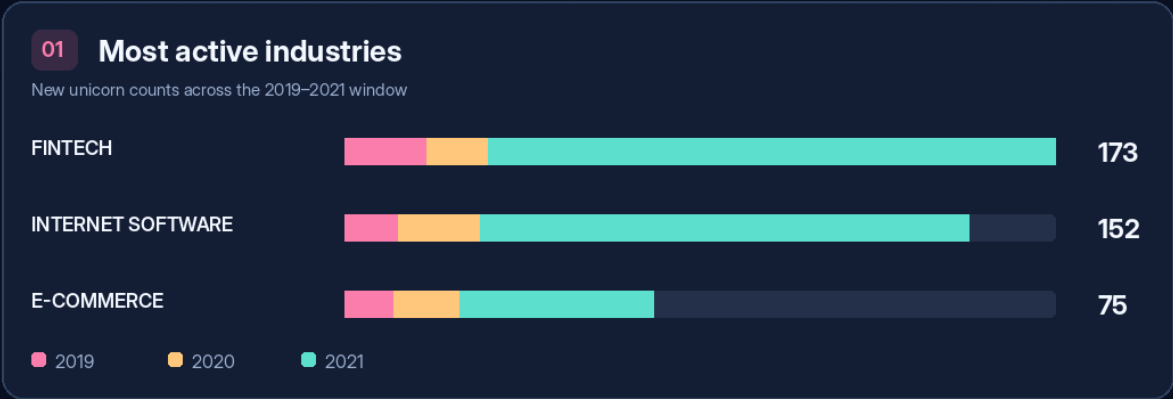

2022 HISTORICAL SNAPSHOT

THE BILLION-DOLLAR CLUB / GLOBAL

Where did the unicorn boom take shape?

RESEARCH WINDOW
2019 – 2021

Industry formation, global expansion and snapshot valuations. New unicorns in 2019–2021.

THE SIGNAL

400 of 732 new unicorns originated in three industries.

DATA NOTE

Cross-sectional 2022 snapshot, not a current market or returns dataset.

This image is a verified-data design preview, not a native Power BI screenshot.
Data are historical (~2022). Snapshot valuation is not a valuation history or an investment return.

The data behind the headline

Rank industries by the combined number of new unicorns during 2019, 2020 and 2021.

732

NEW UNICORNS

400

TOP-THREE TOTAL

520

NEW UNICORNS IN 2021

Industry	Year	New	Avg snapshot \$B
Fintech	2021	138	\$2.75B
Internet software & services	2021	119	\$2.15B
E-commerce & direct-to-consumer	2021	47	\$2.47B
Internet software & services	2020	20	\$4.35B
E-commerce & direct-to-consumer	2020	16	\$4.00B
Fintech	2020	15	\$4.33B
Fintech	2019	20	\$6.80B
Internet software & services	2019	13	\$4.23B
E-commerce & direct-to-consumer	2019	12	\$2.58B

CAUTION / SCOPE

The source mirrors a historical dataset approximately from 2022, not current 2026 private-market conditions.
Mean valuation is the historical source snapshot mean for each join-year cohort, NOT the value at entry.
Some quality flags remain in the source: 16 missing cities, 13 zero-funding entries, 1 inconsistent founding year.
